Profile Summary

Driven and innovative fresher targeting **Full Stack Developer** roles with an organization of high repute with a scope of improving knowledge and further career growth.

- A backend developer with high **problem-solving** skills who develops complex projects.
- Demonstrated ability to manage and deliver projects **efficiently**, from initial planning and design to final deployment and maintenance.
- Possesses knowledge of **multiple technology stacks**, contributing to an efficient development stage of products.
- Strong understanding of **OOP** (Object-Oriented Programming) and **Data Structures and Algorithms** concepts.

Skills

- **Technical skills:** Python, Java, C, C++, DBMS, SQL, HTML, Django.
- **Soft Skills:** Time Management, Adaptable, Collaborator, Analytical.

Academic Projects

- **Fake News Classification Model** **August 2023 – June 2024**
Developed a classification model which accurately classify a piece of news as real or fake. Naïve-Bayes classification model is used which gives 93% accuracy.
Tools and Technologies: Python, NLP, Scikit-learn pipeline, NLTK, WordCloud.
Responsibilities:
 - Pre-processing steps which involves cleaning, transforming, and organizing raw data to enhance its quality for better analysis and model performance. It includes – Removing HTML tags and special characters, Tokenization, Lowercasing, Stop-word removal, Stemming.
 - Extract features from the pre-processed news articles. Employ a variety of text-based features such as bag-of-words, term frequency-inverse document frequency (TF-IDF), and word embeddings
- **Development of an AI based Fertilizer Prediction System** **September 2024 – Current**
Developing a fertilizer prediction AI which is foundational for sustainable agriculture, optimizing resource use to enhance productivity while promoting environmental and economic health. By leveraging machine learning and AI models, this system predicts optimal fertilizer recommendations based on diverse environmental and soil conditions, such as temperature, humidity, and nutrient content.
Tools and Technologies: Python (for machine learning and Flask API), Spring Boot, Scikit-learn, TF-IDF & Naive Bayes.

Academic Details

- Pursuing **Bachelor of Technology (B.Tech.) Information Technology**
MCKV Institute of Engineering, Howrah, West Bengal.

Academic Achievements

- Earned a certification on Artificial Intelligence Internship from IBM SkillsBuild.
- Earned a certification on Python & Django from Udemy
